

Varicella, MMRV, Zoster & FFP - Cool Cube™ Transport Coolers

A Cool Cube™ at Frozen Temperatures is not an ordinary transport cooler. It is a portable, qualified container and pack-out system that keeps temperature sensitive product (varicella, MMRV, zoster, Fresh Frozen Plasma) frozen between -50° and -15°C for over 2.5 days – without using ice or electricity! This simple system streamlines the transport of valuable, frozen product and protects it from warming during off-site use or power outages. The validated, patented technology of a Cool Cube™ saves time, saves money and is improving cold chain management practices around the world. The Cool Cube™ is a container and pack-out system so advanced...it's easy!
