The Cool Cube™ 28 at Refrigerated Temperatures for Vaccine & Medicine is not an ordinary transport cooler. It is a lockable, wheeled, qualified container and pack-out system that keeps temperature sensitive product (fresh vaccine, medicine) chilled between 2°C and 8°C for over 4 days – without using ice or electricity! This cooler is ideal for transport, but also excels at protecting valuable product during off-site use and power outages, regardless of hot or freezing conditions. The simplified, validated, patented technology is the best compact thermal protection product available to maintain the cold chain!
